Woven Conductive Fabric – Silver 20cm square

PRODUCT ID: 1168

DESCRIPTION

This woven conductive fabric is silver-plated nylon. Use small pieces for soft switches, plush keypads, capacitive touch sensors, and other textile interfaces. This highly conductive fabric has a resistance of less than 1 ohm per foot in any direction across the textile. Great for use with FLORA.

Sold as a 20cm x 20cm piece (minimum dimension) Iron on medium if necessary, steam ok. Dry cleaning recommended. Discoloration can occur over time.
