

Gravity: 9 Pcs Sensor Set for Arduino

SKU:DFR0018

INTRODUCTION

This is DFRobot's basic sensor set for arduino. Set includes light sensor, touch sensor, temperature sensor, magnetic sensor, vibration sensor, tilt sensor, big button, LED lighting module and Grayscale sensor.

To connect these sensors to Arduino, we suggest to use our [IO expansion shield V7.1](#) which has color coded pins that provides a much easier way to link sensors to microcontroller.
