ABOUT CROUZET MOTORS

All around the world for more than 50 years, Crouzet Motors has been providing an innovative engineering expertise, high quality service and a complete offer of standard and customized direct drives, geared motors and motion control solutions for all applications where performance is key.

Crouzet Motors is a brand of InnoVista Sensors™.

With a long-term commitment to technological excellence, the engineering teams have mastered the following core technologies and know-how:

- › Electromagnetism
- › Thermal dynamics
- › Electromechanical systems
- › Electronic drives

Covering the power range from 1 to 1000 W peak (1/100 to 1HP+) and available with spur, worm or planetary gearboxes, plus adapted controllers, our offer is specifically designed for access control systems, pumps and valves, railway applications, electrical equipment, medical equipment and the industry.

InnoVista Sensors™: your trusted partner of choice to face industrial challenges of today and tomorrow.

InnoVista Sensors™ is a worldwide industrial specialist of sensors, controllers and actuators for automated systems.

Through its brands, Crouzet Aerospace, Crouzet Automation, Crouzet Control, Crouzet Motors, Crouzet Switches and Sytron Donner Inertial, InnoVista Sensors™ offers a wide range of reliable, efficient and customizable components dedicated to the Aerospace & Defense, Transportation and Industrial market and segments.

Thanks to the recognized expertise of its teams and a strong innovation policy, InnoVista Sensors™ brings performance enhancing solutions to its customers worldwide.

ADAPTATION WHEEL

To meet market expectations and provide customers with the right solutions within the shortest timeframes, Crouzet Motors has structured its processes around the different types of product available: standard products, adapted products or products specially developed for a customer.
Introducing the adaptation wheel...

1 STANDARD PRODUCTS

Sales service

A full range of motors, geared motors and associated controllers. You can create your automation control applications as quickly as possible

2 PRODUCTS WITH ADDED VALUE

Customer Adaptation Centre

All our standard products can have additional factory-mounted auxiliaries or accessories: connectors, leads, special terminals, customized shafts, adaptor plates, etc. Seamless integration in your equipment means you benefit from simpler logistics and optimum installation reliability.

3 ADAPTED PRODUCTS

Customer Adaptation Centre

Defined in coordination between your project teams and our specialists, these adapted products have exactly the right levels of performance and functionality you need for your applications.

4 SPECIAL PRODUCTS

Engineers and teams Dedicated project

From the very start of a project, Crouzet Motors' experts work closely with your teams to develop the specification. All our design, industrialization and approval expertise goes into developing Motion Control solutions that are tailored to your requirements.

DCmind BRUSHLESS

Crouzet Motors, a specialist in customized motorization solutions, now presents its latest generation of High Performance Brushless motors with integrated electronics TNi21 and SMi21.

A pioneer on the European market in 2002 with the Motomate, a Brushless motor with integrated electronics incorporating an intuitive visual programming interface, Crouzet Motors is blazing a new trail for compact standalone applications.

Crouzet Motors, a company continually evolving to meet customer needs, has upgraded its ranges with accessories, gearboxes, part numbers and now, thanks to these electronic devices, has enhanced the performance of its products with:

- › more power
- › more accuracy
- › more functions
- › simplicity of use and ease of integration.

BRAKING AND HOLDING

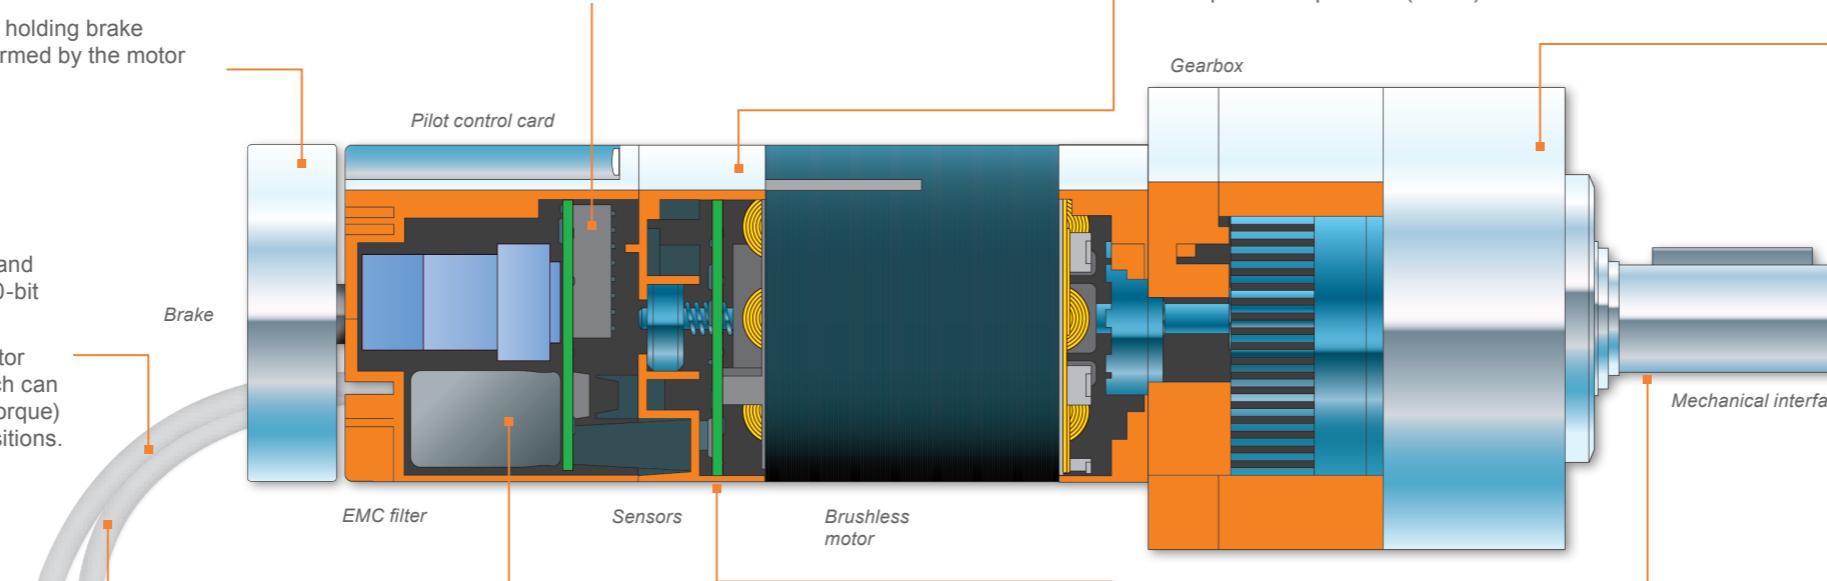

With or without failsafe holding brake (active braking is performed by the motor electronics).

CONTROL

- › TNi21: 4 inputs and 3 outputs, torque and speed control on analog inputs with 10-bit resolution.
- › SMi21: 6 inputs and 4 outputs, the motor has a wide selection of programs which can be set via a PC (position, speed and torque) and can reach as many as 65,000 positions.

POWER SUPPLY

Single supply voltage needed across the whole voltage range:
 › TNi21 (10 - 36 VDC)
 › SMi21 (9 - 56 VDC)

TWO ELECTRONIC PILOT CONTROL DEVICES

- › The TNi21 for simpler applications, dedicated to speed and torque control.
- › The SMi21, dedicated to motion control for applications that require accuracy. Thanks to a 4096-point encoder, it offers all the following control functions: position, torque, speed, direction, braking, etc.

COMMUNICATING

- › A micro-USB socket on the motor (SMi21) can be used to link this directly to a PC.
- › Option CANopen in addition available.

FILTERING AND PROTECTING

- › Short-circuits, undervoltages
- › EMC (received and transmitted)
- › Temperature
- › Mechanical (vibrations, shocks, etc.)

THE MOTOR'S INTEGRATED ELECTRONICS ALLOW YOU TO:

PRODUCT ADVANTAGES

- › Easy and accurate control thanks to an optimized control loop
- › Improved safety with internal thermal protection
- › Safe, reliable operation as a result of its excellent EMC characteristics, due to the shortest possible wiring and shielding with a metal cover

USER ADVANTAGES

- › Save time and improve reliability due to less wiring and fewer connections.
- › Control the logistic problem better with fewer part numbers to manage
- › Save space thanks to a more compact solution

PILOT CONTROL

Motor pilot control card for operation in 4 quadrants, sine operation (SMi21) or trapezoidal operation (TNi21).

GEARBOXES

Using Crouzet Motors gearboxes, the motor speed and torque can be adapted to your applications from 0.01 to 4000 rpm and 0.1 to 120 Nm (0.9 to 1062 in-lbs).

SENSING

- 3 Hall effects for identifying the rotor position.
- SMi21: plus 1 encoder (4096 pulses per motor revolution) for precision of regulation and sinusoidal power supply to the coils.

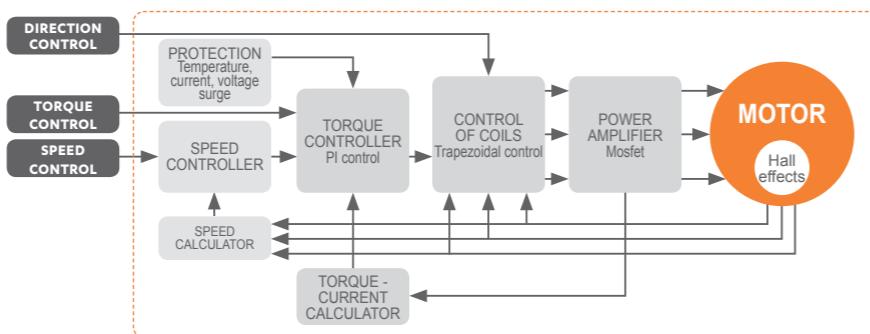

INTEGRATION

Crouzet Motors adapts the mechanical interfaces of its solutions for perfect integration in your equipment: fixing plate, transmission shafts, special pinions.

INTEGRATED ELECTRONICS

TNi21 SPEED AND TORQUE CONTROL:

- 4 inputs, 3 outputs.
- 2 x 10-bit analog inputs for fine-tuned speed and torque control.
- 4 rejective quadrants.
- Use on its own or in combination with other motors or controlled by a PLC.
- Can be used in production immediately (without setup stage).
- Also suitable for a 12 V or 24 V battery power supply (voltage range between 10 and 36 volts).

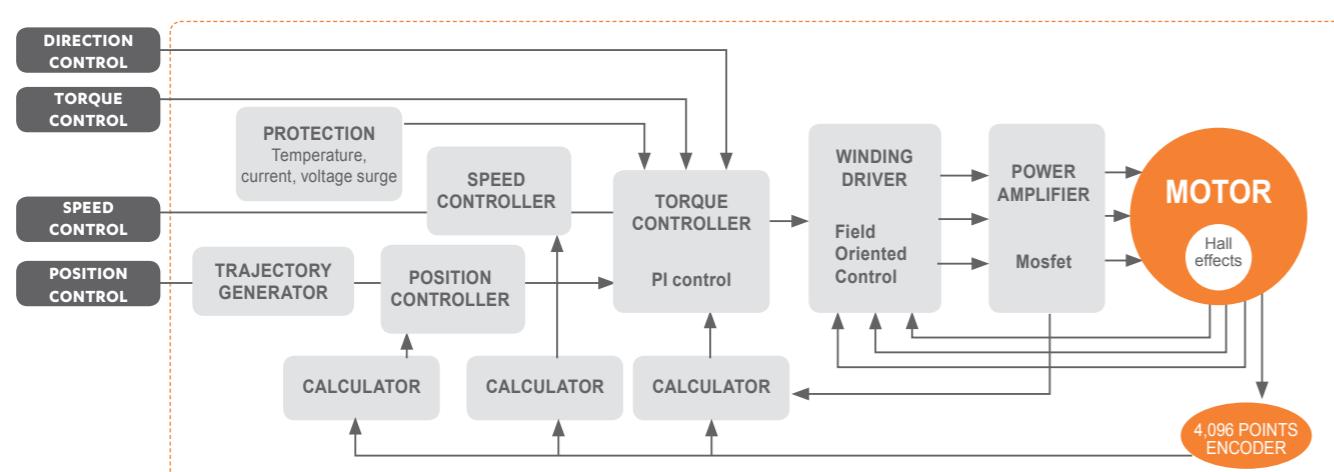

SMi21 POSITION, SPEED AND TORQUE CONTROL:

- 6 inputs and 4 outputs, 2 of which are 10-bit analog inputs.
- Intuitive, easy-to-use setup software - with application mode for quick start-up.
- Very flexible thanks to the various programs on offer. All the parameters are adjustable and can be used to optimise application operation.
- Also suitable for a 12 V, 24 V or 48 V battery power supply (voltage range between 9 and 56 volts).
- Low power consumption when idling (1 W).

- Rotor position controlled with 4096-point encoder and use of sinusoidal vector control.
- Reprogramming and re-use of motors as required by changing the application program or by modifying the configuration.
- Firmware updating made easier with the "bootloader" function.
- Use on its own, in combination with other motors or controlled by a PLC.
- Also available with CANopen communication bus.

CANopen

THE RANGE

MOTOR TYPE	TYPE OF GEARBOX						
	Nominal usable power at 24 VDC	Max. usable power	P52 25 Nm max.	P62 50 Nm max.	P81 120 Nm max.	RAD10 10 Nm max.	
80140	TNi21	77 W	150 W	801495 TNi21	801496 TNi21	-	801410 TNi21

	SMi21 CANOPEN	170 W	419 W	-	-	*	*

* On request

Nominal power ratings may vary according to the supply voltage.
Maximum power ratings are given for the maximum permissible motor voltage.
Example: the 80 280 SMi21 motor develops peak mechanical power of 419 W at 48 VDC.

OPTIONS AND ACCESSORIES

TNi21

- Motors available with or without mechanical brake for holding at breaking current.
- Supplied with 1 control cable and a power supply cable or with a M16 12-pin connector output including all the connections (motors 80140 and 80180).
- Accessory, shielded cable and 12-pin M16 connector.

SMi21

- Motors available with or without mechanical brake for holding at breaking current.
- Requires a standard commercially-available USB/micro-USB cable and the setup software. This can be downloaded free of charge from the Crouzet website or ordered in the form of a "starter kit".

SMi21: DCmind SOFT SIMPLIFIED PROGRAMMING

SIMPLE AND INTUITIVE SOFTWARE

Available in several languages, with multiple possible uses, at any level of performance.

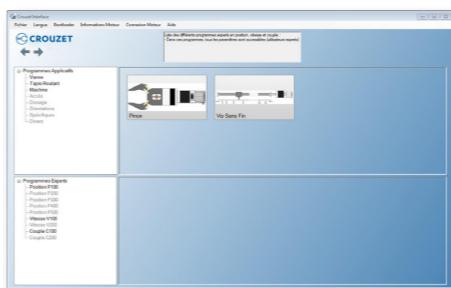

2 PROGRAMMING MODES

- Application approach: Select an application template, then set only those parameters that relate directly to your application. These programs use preset expert programs. You can fine-tune these settings by calling up the corresponding expert program.
- Expert approach: for automation system programs and settings covering a wide range of parameters.

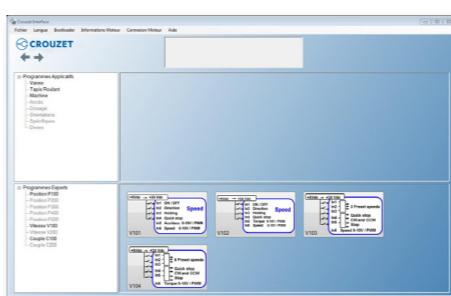

These applicative and expert programs are also available as «program manufacturer» in CANopen.

DCmind SOFT & DCmind SOFT + CANopen

Available on our website www.crouzet-motors.com, or can be supplied on a USB stick in the "starter kits".

"Application" menu

"Expert" menu

"Parameter definition" mode

CHARACTERISTICS

3 languages:

English, French, German. (English for CANopen)

Operating system:

XP Family, XP Pro, Vista, Windows 7.

Application programs:

Valve, conveyor belt, clamp, format adjustment, peristaltic pump, etc.

Expert programs:

Position, speed, torque with digital and analog inputs.

- Numerous programs are available, offering:

- 65,000 proportional positions which can be selected by two 0/10V inputs
- 30 independent positions which can be selected by digital encoding
- A variety of outputs which can be selected to suit your requirements
- The option of setting inverted inputs, selecting 0/10V or PWM operation on the analog inputs, and even setting their operating limit stops
- The option of modifying the control loop PID parameters for difficult applications
- Automatic detection of the reference position for position control ("homing" function)

- Special programs created on request, firmware updating made easier with the "Bootloader" function

- Loading programs simplified with a USB connection

- Other programs to come, please visit our website

APPLICATIONS

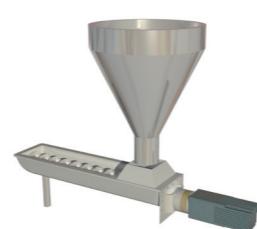

Varied applications where position control, repeated movement and accuracy are key factors.

Stepper operation, detection of thrust and proportional adjustment of forces.

Performing cyclical operation, adjustment of speed and forces. Set to safety mode in the event of a fault.

Several motors combined, operation without a PLC, ease of assembly.

Operation on 12 V battery, low consumption.

S curve pilot control and operation on 12 V backup battery.

Speed pilot control

DCmind: BRUSHLESS MOTORS

Motors 38 to 145 W nominal output power range with TNi21 Speed and Torque Control

- › For control speed and torque applications
- › Very high power density
- › 4 inputs (where 2 of them analog) / 3 outputs integrated electronic controls
- › Holding torque function
- › Battery supply compatible 12 V and 24 V

Comments	Ø 52 planetary gearbox: Metal gears on all stages. IP65 apart from the output shaft.			
Ø 62 planetary gearbox:	On the first stage, the planet gears are made of composite materials which improve efficiency and service life. On the other stages, the metal gears turn on needle bearings. IP65 apart from the output shaft.			
Ø 81 planetary gearbox:	All gears are metal and turn on needle bearings, resulting in excellent robustness and a very long service life. IP65 apart from the output shaft.			
Worm gearbox:	This gearbox combines a tempered steel worm and a hard bronze helical gear wheel, thus ensuring a long service life. The wheel is coated with grease, ensuring an excellent slip coefficient and good heat dissipation. O-rings and lipseals are used in combination with a compression spring to create a tight seal at the gearbox output shaft and the motor input shaft. IP65 gearbox.			
The casing is made of aluminum to maximise heat exchanges with its supporting surface on the machine.				
However, due to the high power that can be transmitted by this gearbox and the low efficiency inherent in large worm gearbox reduction ratios, make sure that the gearbox casing temperature does not exceed 75°C during operation.				
The output shaft can be placed on the right or left, or can be a double shaft (shaft output on both sides).				

Made to order products, available on request

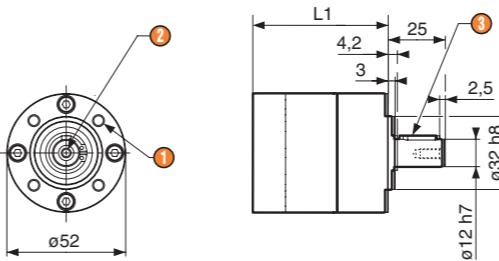

- › Special shafts
- › Other reduction ratios
- › Other fixing holes
- › Special mounting flange

Product made to order

Dimensions (mm)

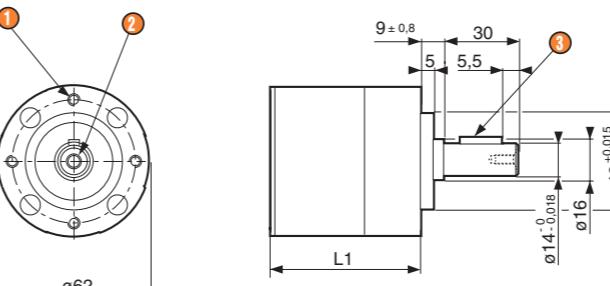

Planetary gearbox Ø 52 (810495)

- ① 4 x M5 at 90°, depth 10 over Ø 40
- ② M4 x 10
- ③ Parallel key 4 x 4 x 16 DIN 6885 A

L1 1 stage: 55.3 ± 0.5
L1 2 stages: 69.5 ± 0.5
L1 3 stages: 83.7 ± 0.5

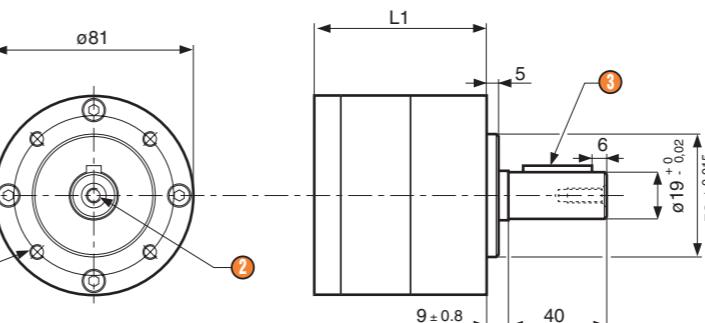

Planetary gearbox Ø 62 (810496)

- ① 4 x M5 at 90°, depth 10 over Ø 52
- ② M5, depth 12.5
- ③ Parallel key 5 x 5 x 18 DIN 6885 A

L1 1 stage: 52.1 ± 0.7
L1 2 stages: 67.9 ± 0.7
L1 3 stages: 83.8 ± 0.7

Planetary gearbox Ø 81 (810497)

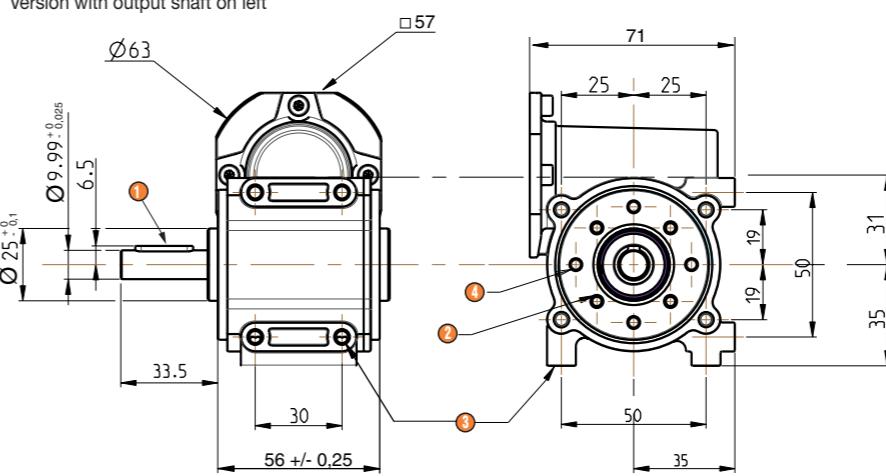

- ① 4 x M6, depth 12 over Ø 65
- ② M6 x 16
- ③ Parallel key 6 x 6 x 28 DIN 6885 A

L1 1 stage: 70.5 ± 0.6
L1 2 stages: 92.2 ± 0.6
L1 3 stages: 113.8 ± 0.6

Worm gearbox RAD10 (810410)

Version with output shaft on left

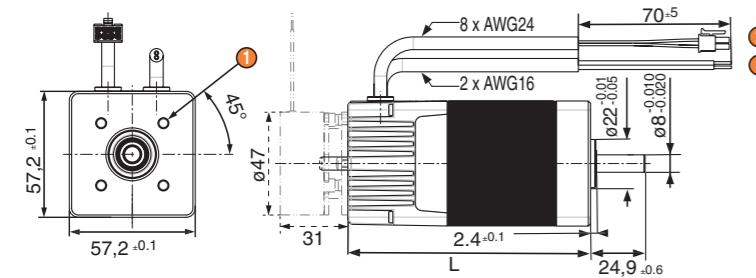

- ① Parallel key 4 x 4 x 20 DIN6885
- ② 4 x M4, depth 8 over Ø 36
- ③ 8 x M5, depth 8
- ④ 4 x Ø 3.8 depth 10 over Ø 40

The left-hand and right-hand sides of the gearbox are identical.
